### •▶ Work Experience

Thomson Environmental Systems, Logan, QLD | Full-Time |  
Junior Technical Data Engineer (June 2024 - July 2025)

- Diagnosed and resolved data pipeline and instrumentation issues to maintain continuous data flow and accuracy, minimising operational downtime.
- Administered and validated scheduled database backups, ensuring data resilience and integrity for disaster recovery scenarios.
- Assisted in the organisation's Integrated Management System (IMS) by documenting Non-Compliance Registers (NCR), contributing to audit readiness and procedural adherence.
- Developed scripts and programs to automate routine processes, increasing team efficiency and reducing manual error potential.
- Logged, triaged, and escalated support tickets to appropriate technical departments, ensuring timely resolution and clear stakeholder communication.
- Provided responsive technical support for internal and external stakeholders, resolving complex queries through direct and remote troubleshooting.

FPW Group, Brisbane, QLD | Part-Time |  
Database Marketing Analyst (June 2023 - January 2024)

- Maintained, organised and filtered customer databases on Excel to ensure data accuracy and enable efficient analysis.
- Provided consultative guidance to clients on financial and property matters through proactive phone communications.
- Generated 4-8 qualified leads per day via targeted cold-calling campaigns to existing customer bases.
- Consistently met and exceeded sales KPIs by securing appointments and driving successful customer conversions.

Woodfordia INC, Woodford, QLD | Internship |  
Network Design Intern (October 2023 - November 2023 )

- Assisted in the design and planning of Woodfordia's internal network systems, contributing to infrastructure layout and connectivity strategies.
